Following the regulatory framework for monitoring indoor air quality in institutions (Decree No. 2015-1000 of August 17, 2015) and the latest recommendations recommended by the High Council of Public Health on ventilation and aeration of establishments open to the public in the context of the Covid-19 pandemic, it is strongly recommended to equip yourself with a CO2 sensor in order to measure the concentration of carbon dioxide (CO_2) in the air and to act quickly in case of strong pollution in the room.
