

Adopt a dynamic sitting position by strengthening the deep muscles of the back and abdominal belt

The ergonomic and practical seat balloon is an alternative to traditional chairs. A real tool for the prevention of musculoskeletal disorders [MSDs]. It will allow you to adopt a good back position while strengthening the trunk and abdominal belt muscles.

With a cool and original design, the seat balloon will give style to your different workspaces. Practical, you can share it with colleagues and/or take it with you wherever you want.

Adopt a dynamic sitting position by strengthening the deep muscles of the back and abdominal belt
